

Download Acupuncture In Pain Management Medical Procedures Testing And Technology

Pain management, pain medicine, pain control or algiatry, is a branch of medicine employing an interdisciplinary approach for easing the suffering and improving the quality of life of those living with chronic pain. The typical pain management team includes medical practitioners, pharmacists, clinical psychologists, physiotherapists, occupational therapists, physician assistants, nurses. Acupuncture is a form of alternative medicine. It is used most commonly for pain relief, though it is also used to treat a wide range of conditions. Acupuncture is generally only used in combination with other forms of treatment. For example, American Society of Anesthesiologists states it may be considered in the treatment for nonspecific, noninflammatory low back pain only in conjunction ... Acupuncture has been shown to be effective for the treatment of nausea and vomiting in adults following surgery or taking chemotherapy and post-operative dental pain.; Acupuncture may be effective in treating a number of other conditions. More research is needed to define more precisely the role of acupuncture in health care.
