Recommendations for Using Fluoride to Prevent and Control Dental Caries in the United States. Fluoride Recommendations Work Group. Steven M. Adair, D.D.S., M.S. School of Dentistry Medical College of Georgia Augusta, Georgia Non-oral causes of halitosis must be considered in the differential diagnosis. It is also important to recognize that some patient reports of halitosis have a psychological basis, rather than being the result of a disease or disorder of an anatomical structure. Carlos JP. (1983). Comments on Fluoride. Journal of Pedodontics Winter: 135-136.. CDC. (2001). Recommendations for Using Fluoride to Prevent and Control Dental Caries in the United States. Introduction. Dental biomaterials have been extensively studied for many decades. Current advances in biomaterial science have led to the discovery of new materials for dental use and have broadened their use in preventive, restorative, and regenerative treatments , .A wide variety of these materials ranging from dental cements, resins, metals, and alloys to ceramic materials are used in ...
